RE: DA2018/1481 - 1 / 0 Veterans Parade NARRABEEN NSW 2101

Apart from the tower being enormous and ugly, i am recovering from a rare form of cancer and am concerned about ANY increased exposure to any kind of radiation, apparently harmless or not. I know studies are currently inconclusive, but it's impossible to look at the big picture long term because these towers havent been around long enough yet. It's one thing to move in to a house knowing there's a tower next door, it's another to have one thrust on you when you're already living in an area. I wonder who's responsible if these towers are found to be cancer causing (or other health conditions) in the future?
