Subject: Stony Range

I am appalled to learn, with ad far as I can tell, no consultation that a large development of 8 and 5 storey buildings has been approved to be built verging on Stony Range Regional Botanic Gardens. Dee Why is a nightmare of over development and this is the only natural area on the Western flank of the town. The new buildings will overshadow the garden and no doubt the land disruption caused by digging foundations and probably underground parking can only be detrimental to the existing flora.

This is an area held in great affection by residents across the Northern Beaches and it is very sad that such developments can occur with so little input from the people who actually live here.
