RE: Landscaping

Further to my previous document I would like to add another comment in regards to the landscaping which is below for your information.

There are tall trees on the property that are over 8 meters. The plans do not identify/label all of the individual significant trees on the property and so it is difficult to know whether some trees will be removed or are to remain. There is a large tree that is around 8-10 meters in the middle of the property that looks like a native fig, close to other tall palms. There is a large gum tree at the back of the property also however I am not sure if this is on this property or adjoining land.
