Chief Executive Officer

Northern Beaches Council

Dear Sir

Re: Development DA2021/ 0419

I had previously provided agreement with the above development.

However upon further advice from neighbours concerning above D.A. I would like to enter a new submission which raises some concerns concerning this development as set out .

Apparently the subject site is surrounded by sensitive E4 Environment Living Low Density Residual environment, with strict building envelope controls that are adhered to and regularly enforced by Council refusals.

I am informed the proposed development in this heavily controlled E4 Environment Low Living Low Density zone , exceeds building envelope controls and many other controls .

Best Wishes,

Robert D Wines
