Re: Application Number: DA2020/1233

The Watermark Freshwater Residents Committee has been elected to represent the residents of the 96 apartments on the site that is now the subject of this DA.

In the Statement of Environmental Effects by Urbis dated 24 September 2020 lodged with this application it was "recommended that residents of the site be informed of the proposed development prior to lodgment of the application to Council". This did not happen. The Residents Committee was notified by email on 25 September that a submission would soon be made to Council in relation to the Bowling Green, however, no formal particulars were provided and we understand that it was not until 16 October 2020 that full details of the proposal were posted on Council's web site.

There still has been no consultation by the Mounties Group with residents or the Residents Committee on the proposal.

Since then we have forwarded the link to your Web Site to our fellow residents and asked whether they wished us to make any representations to Council on their behalf, of the replies 100% voted that they wished us to do so.

The many documents lodged with this DA are long and complex. We would like the opportunity to read and consider the contents and then, if needed, obtain professional advice.

In view of the short period of time now remaining and bearing in mind that all residents who may wish to make separate representations are seniors, we ask that you extend the submission time until 26 November 2020.

Your early response would be appreciated.

Yours faithfully

Bert van den Broek
