RE: DA2019/1234 - 0 Wharves And Jetties MANLY NSW 2095

I strongly oppose this development application of a rooftop open area for drinking and music as we are already struggling with the noise, music and drunkenness at the Wharf and this already adversely affects our lifestyle, ability to enjoy our apartment and sleep at night. This application would further increase noise and drunked behavior impacting on people's ability to enjoy their own family and social life as well as sleep and rest especially when the development is an open area which directly faces our homes. This development would make living in the vicinity of the wharf unbearable.

We sincerley hope council considers its people's needs in rejecting this submission on the interests of the health, safety and environment at Manly.
