RE: REV2022/0024 - 394 Barrenjoey Road NEWPORT NSW 2106

A properly designed seawall and additions to the building to enable this thriving club to continue to service the public is frankly a 'no-brainer'. The current plans are sensible, realistic and are a positive way forward.

More stalling will continue to cause damage to the building. Agreeing to the plans now means the clubhouse and extensions can be progressed.

This club nurtures young athletes and provides a service for the local population and many visitors. The current facilities are inadequate and the plans submitted will ensure the club continues and remains one of longest serving clubs in NSW
