RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

The beach has been sustaining storm damage undercutting properties for at least 100 years, as evidenced by historical photographs freely available on the internet. Why these houses were allowed to be built is irrelevant. They should be protected to a point, but the monstrosity currently under construction should not be extended. Such seawalls built in other areas have done nothing except exacerbate depletion of the sand and leave a wall with little or no beach. This is an outcome no one wants. Not the home owners, or beach users. What is there should now remain, but not be extended further north. Thank you.
