Subject: RE: Plan of Fern Creek Land Swap with amendments

Hi Gina

Having walked over the sites of 9,12 and 13 Fern Creek Road Warriewood where I observed some of the locations where investigative drilling has recently taken place, plus reviewing the contamination survey map, I believe Council has been provided with sufficient details of the condition of the lands and no further investigations are required at 13 Fern Creek . Noting where the logs were taken on 9 Fern Creek and the native vegetation along creek line I believe we do not need to carry out further investigation to determine the condition of the ground at this location.

Cheers
