638 Pittwater Road BROOKVALE

The proposed development at 638 Pittwater Road Brookvale includes an architectural feature at the corner of the building 2 metres above the main roof. The feature is in the form of an illuminated light disk.

Light Disk

The light disk will provide a distinctive feature to highlight the corner of the block and the intersection with Orchard Road at a slight change in direction along Pittwater Road.

It will give some presence and significance to the corner of the building which is also above the ground floor entry to the main commercial space of the building.

The light disk will provide a landmark point - day and night- along Pittwater road for people in cars and other vehicles passing this location on their journey.
