Hi Kinga,

This email is to confirm that there are no changes to the arboricultural assessment (Version 4 dated 30/01/23) as a result of the amended plans (Issue 2 dated 22/01/24).

There are no changes to the impact footprint and no additional impacts on trees. All drawings, results, and recommendations contained within the arborist report are still valid.

Kindest regards,

Phil Witten
