**RE: DA2019/0107 - 44 Rose Avenue WHEELER HEIGHTS NSW 2097**

Here we go again.... writing another submission against another DA that will probably "tick all the boxes" again from the so called experts.

No one is listening to the residents that care about our suburb until its happening next door to YOU

Traffic is horrendous on Rose.

Parking on the streets is dangerous.

Garbage Bin collection day is Crazy with pedestrian traffic weaving in and out of the Bins on the footpaths.

All our large blocks and our Battle Axes on Rose, Berith and Lantana are Doomed.

The Veterans Parade Residents will see more traffic chaos on their street with the current DA's and for further future developments.

May I suggest extending the footpath on Rose from #38 down to the next bus stop at #70.

And for safety please put in a pedestrian crossing at #42 over to #29 with a crossing from the lower side of Berith St near Rose to access the bus stop on Rose Ave

Vehicle parking on one side of the street in Rose ave in the AM and the other side PM needs to be looked at. This could help the Transit Buses manoeuvring thru the parked congestion on Rose between Berith thru to Veterans.

Traffic lights and over/underpasses will be another topic for discussion one day
