RE: DA2020/0552 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

I'm extremely concerned about this proposed development encroaching on Manly Dam. I've lived in Manly my whole life and have watched as more and more bushland is eaten up by developers. Surely it's enough that we have lost innumerable plant, insect and animal species due to climate change and the horrendous bush fires of last summer, but do we have to eat away the bushland in Manly Dam as well, endangering fish, animals and plant lives? The bush here, and its occupants provide much needed oxygen and healing space. And to sit by a creek and spot a galaxis or a turtle ... to sit quietly and hear the birds and smell the damp earth or the boronia and wattle. Please, I ask of you, please don't go ahead with this development here, our lungs and mental and physical health depend on it.

Please, don't add to the destruction of nature in our area. Can

T you find another more suitable location that won't impact so heavily on the little green spot we have left?
