RE: 6 Jackson Street Balgowlah 2093

To Whom it may concern

Having reviewed the proposal to install a louvered roof pergola at the above address, we can confirm that such an installation will not require further Fire Safety Measures to be added to the existing Schedule of Fire Safety Measures for the SP74337 strata building. This is subject to the condition that the accredited private certifiers submission for development application has no further measures required for the Final Certificate.

Kind Regards
