To whom it may concern,
I live at 11/6-7 Funda place brookvale, 20-22 cross street brookvale backs onto my property. I have big concerns over the amount of noise a gymnasium will make to my unit and my neighbors units as we have many windows and balconies facing unit 12 at the same level. The current factory at 20/22 cross street has a gymnasium on a lower floor (unit 9) and caused some trouble with noise from people opening windows facing apartments and playing loud music and flipping tractor tyres from around 5:30 am. It was resolved through council with the tenants keeping the windows closed at all times and being more considerate with the level of noise. I don't want this to happen again as the current tenants of the other units at 20-22 cross street make too much noise as it is and this will only add to it.

Regards
Sharon Murphy
