RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

I am an owner of a nearby property and am writing to oppose this application for the proposed tower. There are many reasons why this application should be refused.

The tower presents an extremely unacceptable health risk to children using the fields, attending the local primary school nearby (CCNPS) as well as to neighbouring residents and beach goers.

There are thousands of peer-reviewed scientific studies show adverse effects on the body. Top insurers, Lloyd's of London and Swiss RE no longer cover health damage caused by electromagnetic radiation directly or indirectly arising out of, resulting from or contributed to by electromagnetic fields, electromagnetic radiation, electromagnetism, radio waves or noise. Children are more susceptible to exposure. Also, the application lacks transparency - there is no mention as to exactly what the "associated equipment" consists of.

There are currently no issues with signal on any network (including Optus) so there is no need for this tower to be installed.

A lot of work has gone into rehabilitating the lagoon edge including a funding grant from the Environmental Trust. Having a tower in this neighbourhood is not aesthetically pleasing and certainly would not fit in with the landscape (especially the magnificent beach only a short distance away).

Kind regards
