RE: DA2020/0552 - 181 Allambie Road ALLAMBIE HEIGHTS NSW 2100

To whom it may concern,

I strongly urge the disapproval of this new development on this remnant bushland. Manly Dam has a significant amount of biodiversity and aboriginal cultural importance, to continue to destruct vital habitat and culturally significant areas in a time of recognising Aboriginal Indigenous and their beliefs would be a slap in the face. The construction of this new development will surely further degrade resilient surrounding bush through concentrated run off and particle transfer through the soil, encouraging the introduction of invasive weed species into healthy bush.

Please consider the effects this Development as it effects community, cultural values and vital habitat to flora and fauna.

Rachel Fleming
Bush Regenerator/ studying environmental scientist.
