With regard to the 3D views, these represent the images taken from the perspective of the sun's position at the time nominated (i.e. you are looking from the sun towards the subject building). What is hidden / not visible beyond the subject building is where the shadows will be cast. There is evidently very little difference as a result of the proposed works, with the walls of the existing buildings to the south of the site already being shaded by the existing three storey development. The additional level proposed adds shadow to the roof of the buildings to the south and does not therefore impact any windows which currently have solar access at these times.
