RE: DA2020/1063 - 2 / 0 Bennett Street CURL CURL NSW 2096

Deeply disappointed by the council for proposing a floodlighting plan with out proper assessments of light and noise pollution.

I wish to oppose the submission for the flood lighting. I am concerned for the residents in Curl Curl. When visiting on the weekends it is already very congested due to sporting events, how will they cope with traffic and parking congestion 7 nights a week too?! What with light pollution and noise pollution along with traffic and parking problems it seems extremely unnecessary and will cause chaos for local Curl Curl residents.

There are numerous playing fields within the northern beaches that have sufficient flood lighting for evening sport. Why should our taxpayers money be wasted on this. I do not support this proposal and urge the council to not go ahead with the floodlighting
