RE: DA2021/2034 - 30 Fairlight Street FAIRLIGHT NSW 2094

We request that Height Poles be erected to show the height and bulk of the proposed Property Development so we can assess the impact on Our Views

This Property Development is directly in front of our property between us and the Sydney Harbour and directly impacts our Sydney Harbour Views.

Therefor, so we can assess the impact on our views, we request that height poles be erected showing the height of the development and outline of the development. Then we can properly determine the impact on our Harbour views and if it warrants an objection.

The scale and bulk appears to be substantial given that it is only one residential block of land to have so many residential units on it.. The area is already high density living and parking a real problem.
