**RE: DA2020/1063 - 2 / 0 Bennett Street CURL CURL NSW 2096**

WHAT AN ABSOLUTE JOKE!

Northern Beaches Council submitting a DA to be determined by Northern Beaches Council. Paying who knows how much from ratepayer's money for a "you beaut" report by BBF Planners who can't even get the photographs of Manuela Place and Holloway Place, two of the most impacted streets, correct.

The report presents beautiful pie charts that tell us that 95% of submissions are in support of the proposal.

How about we see a pie chart showing the percentage of support from people who are actually impacted by this proposal. Like people living in Bennett Street, Holloway Place and Manuela Place who are going to have 30 metre high flood lights erected within 20 metres of their bedroom windows. Not to mention the noise and traffic implications as well.

Have to love the submissions from people living in Mosman and North Sydney, not even in our LGA, who when they go to bed at night will be 20 kilometres from the flood lights not 20 metres.

Can't object to this proposal strongly enough. We already have to put up with traffic congestion during the weekdays with students from Freshwater Campus, even though we were promised several years ago by Council that the school would not be accessed via Bennett/Brighton Streets - didn't happen. We all accept that traffic congestion at weekends with sporting events is unavoidable as this is where we chose to live.

However, to now be told that we will be subjected to this congestion and noise as well as the lights seven nights a week is just too much.
