**RE: DA2019/1274 - 70 South Creek Road DEE WHY NSW 2099**

I have read the traffic control proposal for time during construction, and it does not make any reference to Parkes Rd. Parkes Rd currently has a very high traffic level during school drop off and pick up times. Additionally, cars are parked on both sides of the road during school hours. The 180 bus uses this road as well. All of this causes immense congestion, and makes it extremely hazardous for homeowners to enter and leave their driveways. The situation has gotten worse due to COVID, with restricted access to the school grounds. No where in the application did I see a solution to the already parking/dropping off/picking up hazard to local residents. Please advise how traffic will be effectively managed during construction and also how the school intends to manage school traffic during school times.
