Submission

The need for a turning area at the end of Bellara Ave currently is minimal, as it is only the odd delivery vehicle that has any problems in turning at the end of this street. Although, council should have provided a proper turning circle originally but, after 40 odd years we are unlikely to get one. However, this proposal for a 3 point turn bay, is there any around here?? I have only seen turning circles in Cul-de-sacs - NOT turn bays! The plan indicates the bay will be only slightly wider than the street itself and very little depth, which means tight turns and difficulties in negotiating it, might as well just turn at the end of the street anyway. It appears there is a proposed new driveway to be built attached to this new turn bay for the proposed development DA2018/1335. It would appear this is the only reason for this turn bay, and as this is not yet approved it is all too premature anyway. One can imagine how congested the bay will be if the development goes ahead, trades vehicles totally congesting the bay - will there be permanent

no Standing signs in that area? I have raised objections to the DA in question and they still stand. If a turning area HAS to be constructed here it should be a proper circle to be negotiated in ONE movement. Yours Sincerely Mr David Grantham 27 Bellara Ave Nth Narrabeen
Resident here for 37 years
