ACID SULPHATE SOILS MANAGEMENT PLAN

159 RIVERVIEW ROAD AVALON BEACH

Dear Sir,

I am writing to you in response to the request to provide an acid sulphate soils management plan for the above development application being submitted through the Planning Portal.

Please note that the proposed workshop is to be constructed entirely above ground and will be supported on the existing supporting piles.

No excavation works are being performed likely to liberate acid sulphate.

Thank you for the opportunity to clarify this aspect of the proposal.

LANCE DOYLE
