**RE: DA2019/1119 - 4 / 0 Bennett Street CURL CURL NSW 2096**

Having weekly markets at the bowling club would be hazardous to the roads and the parking situation. The markets are going to take up most of the existing parking at the club and there will be no room for cars to park on the neighbouring streets. We already have severe parking issues on the weekends with Rugby, AFL, Hockey, soccer, netball, cricket and the bowling club all taking place and the numbers participating in these sports is growing every year. There is no parking to support the people attending these markets. Bennett street is very congested with cars parking on one side of the road, so where do you think people attending these markets will park?

Also there is the noise issue every Sunday morning from 7 am. This is not fair on the local residents. Markets will be using generators and blasting music every Sunday morning, this is not acceptable.

There is not adequate space in this area for the markets themselves and the additional traffic that will be brought into the area. This is a narrow driveway into a car park so once the stalls are set up there will be barely any room for pedestrians.

The markets should be given ample space and should have ample parking to keep it safe and enjoyable for all attending and those working there. This site is completely unsuitable for a Sunday market.
