INDIGENOUS ACKNOWLEDGEMENT

Arcadia respectfully acknowledges the Traditional Custodians of the lands upon which the site is located. We acknowledge their unique ability to care for Country and deep spiritual connection to it. We honour Elders past, present and emerging whose knowledge and wisdom has and will ensure the continuation of cultures and traditional practices.

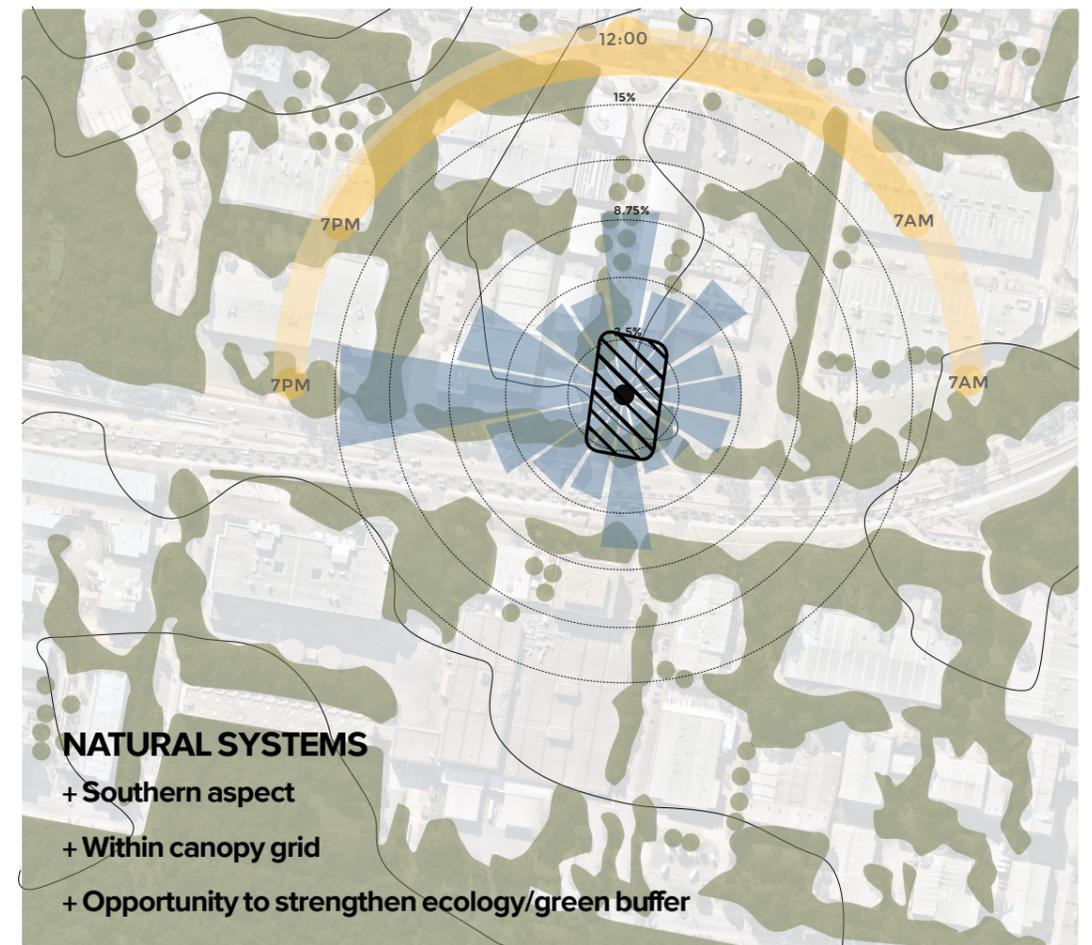

ANALYSIS

Located in Frenchs Forest along Warringah Road, a key transport corridor to the Northern Beaches, the Maui Encology Centre services patients from the nearby Northern Beaches Hospital.

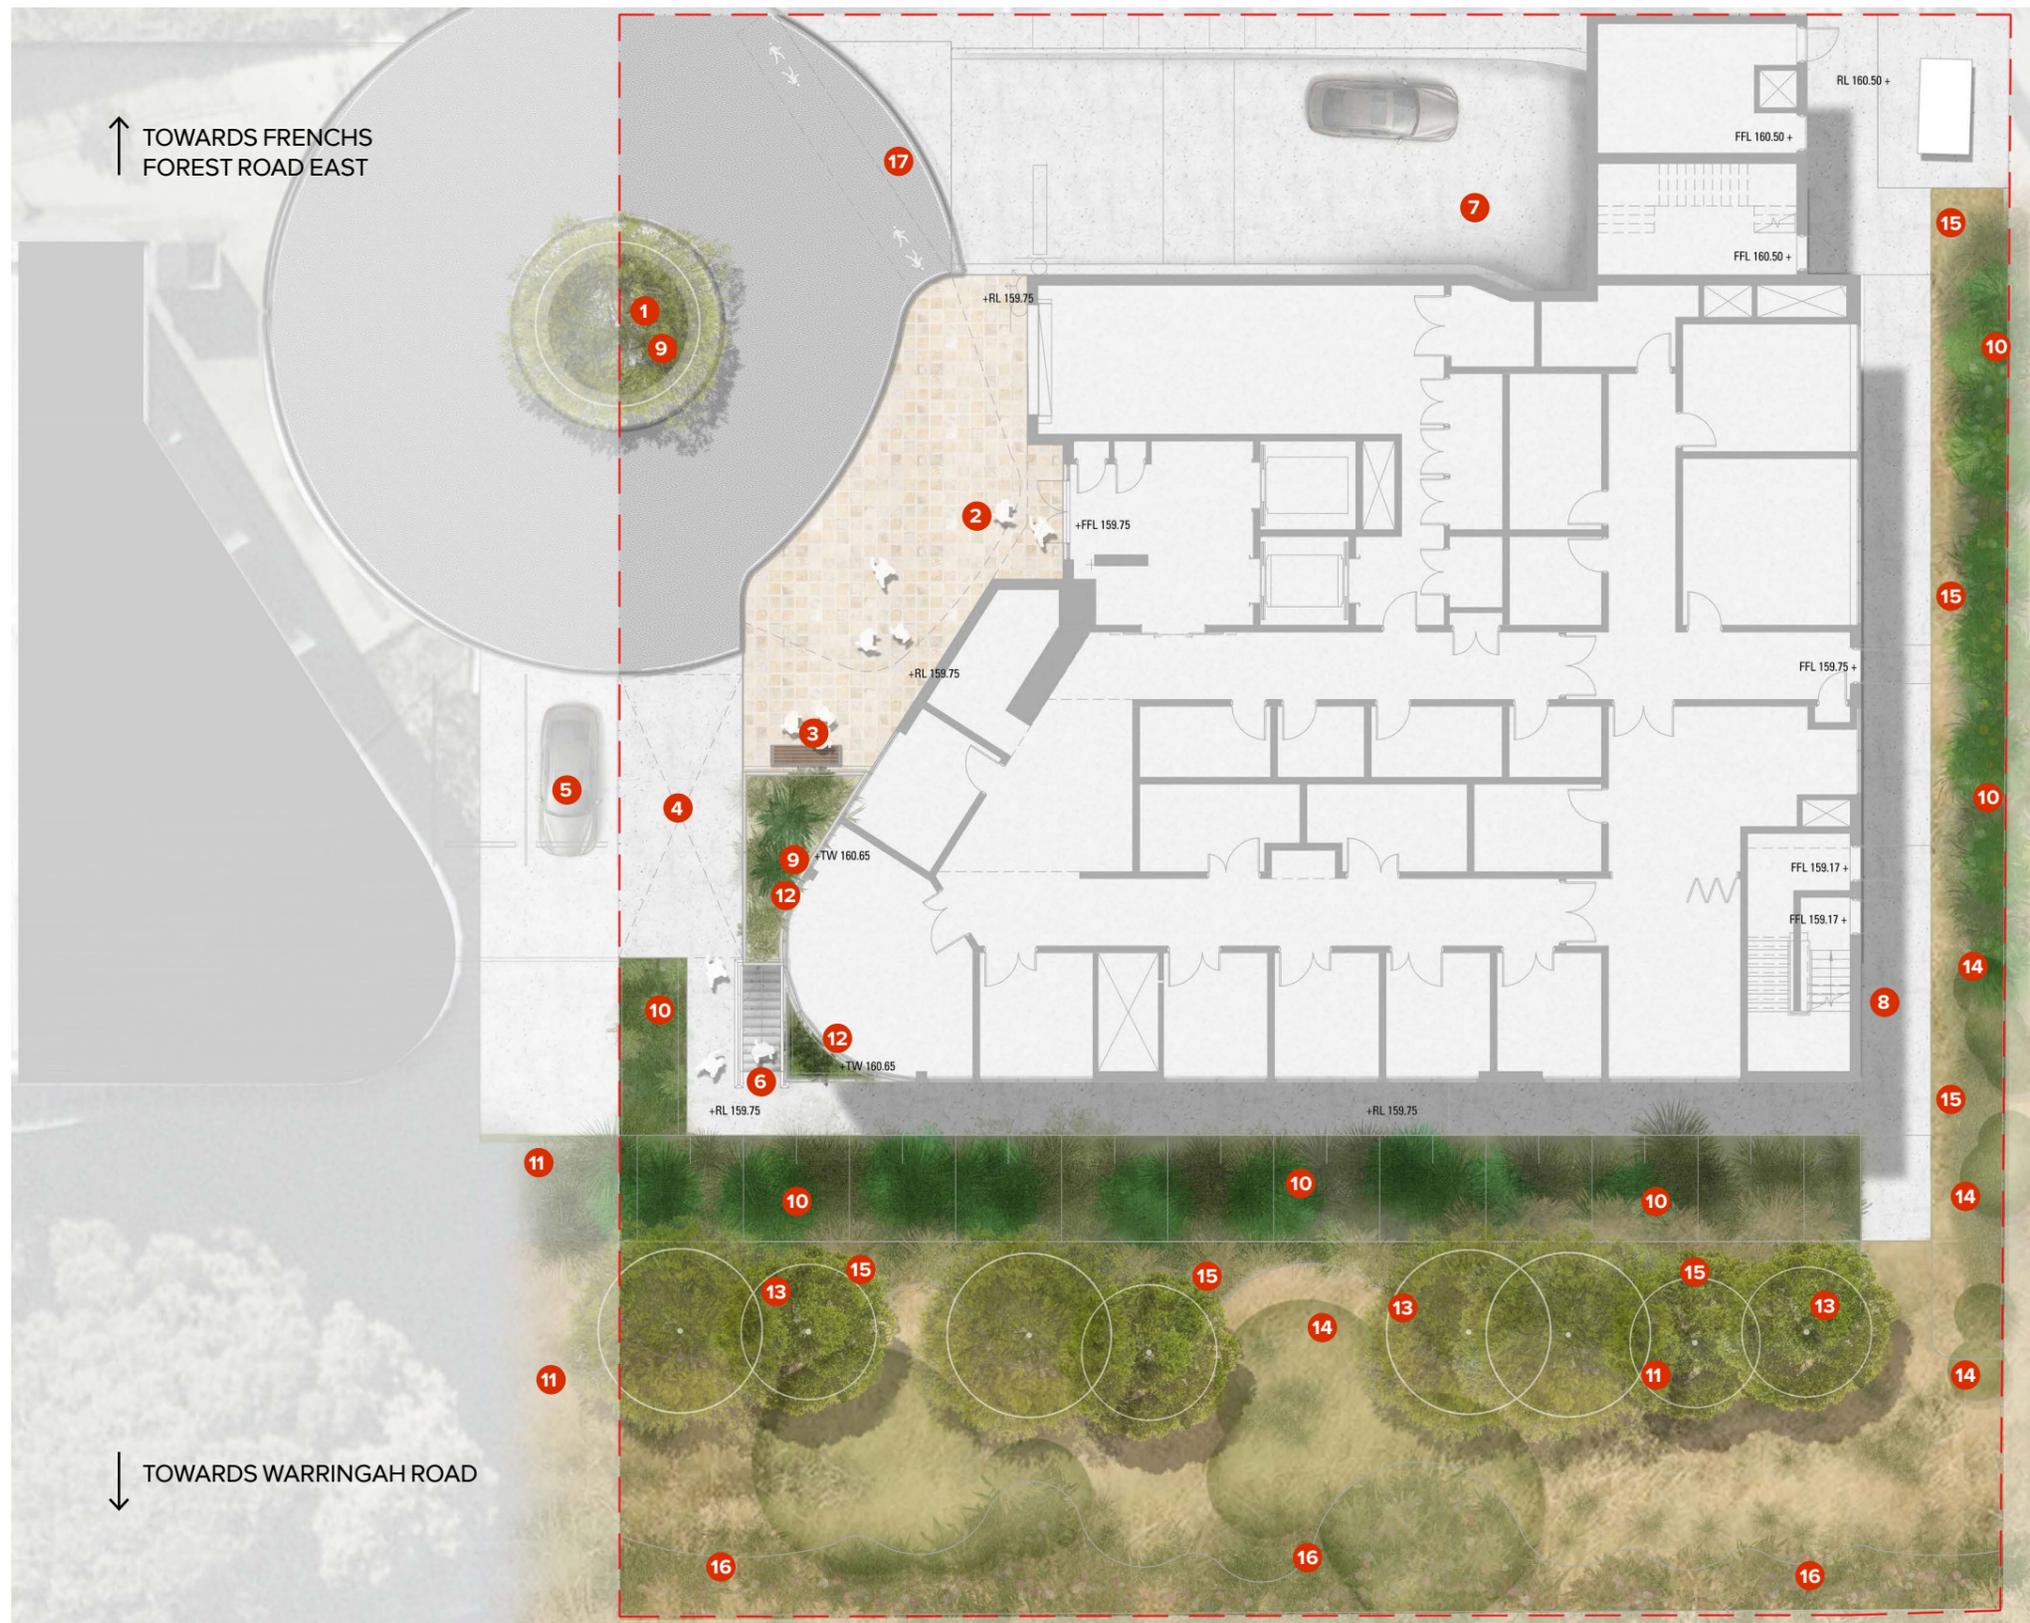

The centre is located within an industrial estate, where the landscape character is tidy, albeit ubiquitous. Sited within a green grid connecting Garigal National Park to Middle Harbour, there is opportunity for the landscape design to strengthen ecological connections.

- MAUI ONCOLOGY**
- + 600 metres from Northern Beaches Hospital
 - + Within Northern Beaches LGA
 - + Located within green grid of Northern Beaches

CONCEPT PLAN

Terminating the access road with feature planting endemic to the Northern Beaches, the landscape concept takes its cues from the surrounding landscape character and provides a well placed setting to work and visit.

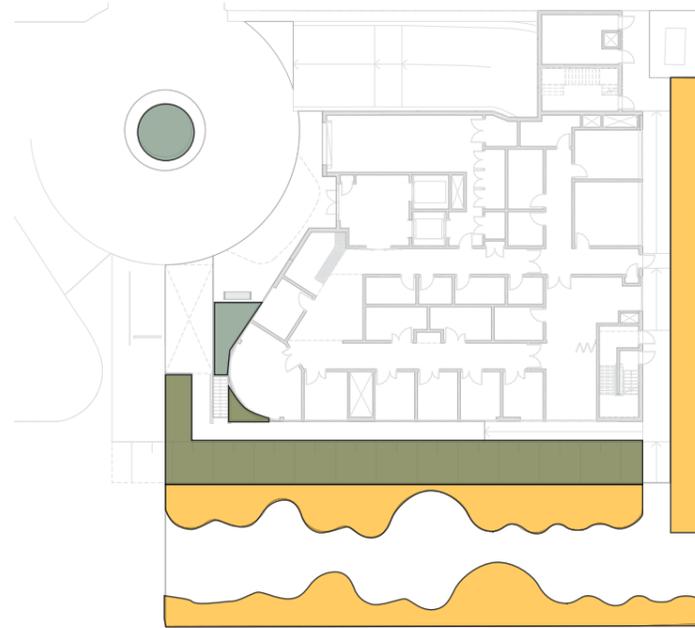

Using local species, the planting palette is hardy, drought tolerant and provides habitat for local species and works to strengthen the green grid within the industrial estate as well as along the Warringah Road corridor.

RE: E179 - Maui - Landscape Documentation

Dear Mr Ryan Cooke,

This letter has been prepared in response to comments to the landscape architectural drawing set in relation to the E179 Genesis Maui development.

Comment 01: The plans are not considered to adequately address the local planning controls, particularly in relation to the side setback treatment and setback to the main road (Warringah Road). The controls envisage high quality landscape treatment for a business park and dense native planting to the landscape setback areas to enable integration with the streetscape and surrounding development.

Response 01: We have added native matrix planting along the Eastern boundary easement and some screen planting consisting of some endemic and recommended species from the Northern Beaches Hospital Connectivity and Network Enhancement Project (see link below).

[\[https://www.rms.nsw.gov.au/projects/01documents/northern-beaches-hospital/nbh-urban-landscape-design-report.pdf\]](https://www.rms.nsw.gov.au/projects/01documents/northern-beaches-hospital/nbh-urban-landscape-design-report.pdf)

Comment 02: The plans indicate extensive areas of turf and few local native canopy tree and taller shrub species in the treatments.

Response 02: We have restricted planting to the Southern area of the site due to an existing stormwater detention tank that is to be retained. We have also restricted tree planting to the Eastern boundary easement due to existing electrical services easement.

Kind regards,

Alex Longley
