**FORM 4**

## ONGOING MANAGEMENT OF WASTE

[illegible]

Describe how you intend to ensure ongoing management of waste on-site (eg. Lease conditions, caretaker/manager on site).

During the demolition and construction phases, an area will be used which will be sectioned off and used as a holding area for the storage of waste building material. As much as possible the builder will separate the building waste to determine whether any of the waste can be recycled back into the building construction. If not, the building waste will be removed from the site by a licensed waste management contractor and taken by skips to a suitable waste collection depot.

The site will be kept tidy at all times during the construction phase. On-going waste management for the householder will be carried out by council contractors.
