

## Clause 4.6 Exceptions to Development Standards (Height of Buildings)

### 4 Jamieson Avenue, Fairlight

#### 1. Introduction

Clause 4.6 of the Manly Local Environmental Plan 2013 (MLEP 2013) permits departures from development standards in certain circumstances. In this case, it is necessary to consider if compliance with the development standard is consistent with the aims of the policy and, in particular, does compliance with the development standard tend to hinder the attainment of the objects specified in section 1.3 of the *Environmental Planning and Assessment Act 1979 (EP&A Act)* being:

*(a) to promote the social and economic welfare of the community and a better environment by the proper management, development and conservation of the State's natural and other resources,*

*(b) to facilitate ecologically sustainable development by integrating relevant economic, environmental and social considerations in decision-making about environmental planning and assessment,*

*(c) to promote the orderly and economic use and development of land,*

*(d) to promote the delivery and maintenance of affordable housing,*

*(e) to protect the environment, including the conservation of threatened and other species of native animals and plants, ecological communities and their habitats,*

*(f) to promote the sustainable management of built and cultural heritage (including Aboriginal cultural heritage),*

*(g) to promote good design and amenity of the built environment,*

*(h) to promote the proper construction and maintenance of buildings, including the protection of the health and safety of their occupants,*

*(i) to promote the sharing of the responsibility for environmental planning and assessment between the different levels of government in the State,*

*(j) to provide increased opportunity for community participation in environmental planning and assessment.*

The aims and objectives of Manly LEP 2013 Clause 4.6 are as follows:

*(a) to provide an appropriate degree of flexibility in applying certain development standards to particular development,*

*(b) to achieve better outcomes for and from development by allowing flexibility in particular circumstances.*

**Commencing on 1 November 2023** Clause 4.6(3) and (4) of the MLEP 2013, state that development consent, that contravenes a development standard, must not be granted unless the consent authority is satisfied the applicant has demonstrated that:

*(a) compliance with the development standard is unreasonable or unnecessary in the circumstances of the case, and*

*(b) there are sufficient environmental planning grounds to justify the contravention of the development standard.*

*(4) The consent authority must keep a record of its assessment carried out under subclause (3).*

These matters, along with case law judgements from the NSW Land and Environment Court, are addressed below.

## **2. Environmental Planning Instrument Details (Manly LEP 2013)**

### **2.1 What is the name of the environmental planning instrument that applies to the land?**

Manly Local Environmental Plan 2013

### **2.2 What is the zoning of the land?**

R1 – General Residential

### **2.3 What are the objectives of the zone?**

- *To provide for the housing needs of the community.*
- *To provide for a variety of housing types and densities.*
- *To enable other land uses that provide facilities or services to meet the day to day needs of residents.*

### **2.4 What is the development standard being varied?**

Cl 4.3 - Height of Buildings

### **2.5 Under what clause is the development standard listed in the environmental planning instrument?**

Cl 4.3 of the Manly Local Environmental Plan 2013

### **2.6 What are the objectives of the development standard?**

*(1) The objectives of this clause are as follows:*

*(a) to provide for building heights and roof forms that are consistent with the topographic landscape, prevailing building height and desired future streetscape character in the locality,*

*(b) to control the bulk and scale of buildings,*

*(c) to minimise disruption to the following—*

*(i) views to nearby residential development from public spaces (including the harbour and foreshores),*

*(ii) views from nearby residential development to public spaces (including the harbour and foreshores),*

*(iii) views between public spaces (including the harbour and foreshores),*

*(d) to provide solar access to public and private open spaces and maintain adequate sunlight access to private open spaces and to habitable rooms of adjacent dwellings,*

*(e) to ensure the height and bulk of any proposed building or structure in a recreation or environmental protection zone has regard to existing vegetation and topography and any other aspect that might conflict with bushland and surrounding land uses.*

**2.7 What is the numeric value of the development standard in the environmental planning instrument?**

The numeric value of the height of buildings development standard applicable to the subject site is a maximum of 8.5m.

**2.8 What is proposed numeric value of the development standard in your development application?**

The development proposes a maximum building height of 9.1 metres (consistent with the existing maximum building height).

**2.9 What is the percentage variation (between your proposal and the environmental planning instrument)?**

The percentage variation sought is 7% or 0.6 metres.

### 3. NSW Land and Environment Court Case Law

Several key Land and Environment Court (NSW LEC) judgements have refined the manner in which variations to development standards are required to be approached. The key findings and direction of each of these matters are outlined in the following discussion.

#### 3.1 *Wehbe v Pittwater* [2007] NSW LEC 827

The decision of Justice Preston in *Wehbe v Pittwater* [2007] NSW LEC 827, (expanded on the findings in *Winten v North Sydney Council*), identified 5 ways in which the applicant might establish that compliance with a development standard is unreasonable or unnecessary. It was not suggested that the five ways were the only ways that a development standard could be shown to be unreasonable or unnecessary.

The five ways outlined in *Wehbe* include:

1. *The objectives of the standard are achieved notwithstanding non-compliance with the standard (First Way).*
2. *The underlying objective or purpose of the standard is not relevant to the development and therefore compliance is unnecessary (Second Way).*
3. *The underlying object or purpose would be defeated or thwarted if compliance was required and therefore compliance is unreasonable (Third Way).*
4. *The development standard has been virtually abandoned or destroyed by the Council's own actions in granting consents departing from the standard and hence compliance with the standard is unnecessary and unreasonable (Fourth Way).*
5. *The zoning of the particular land is unreasonable or inappropriate so that a development standard appropriate for that zoning is also unreasonable and unnecessary as it applies to the land and compliance with the standard would be unreasonable or unnecessary. That is, the particular parcel of land should not have been included in the particular zone (Fifth Way).*

In the *Micaul* decision Preston CJ confirmed that the requirements mandated by SEPP 1 (as discussed in *Wehbe*) are only relevant in demonstrating that compliance with a development standard is unreasonable or unnecessary for the purpose of Clause 4.6(3)(a).

#### 3.2 *Four2Five Pty Ltd v Ashfield Council* [2015] NSW LEC

In the matter of *Four2Five Pty Ltd v Ashfield Council* [2015] NSW LEC, initially heard by Commissioner Pearson, upheld on appeal by Justice Pain, it was found that an application under Clause 4.6 to vary a development standard must go beyond the five (5) part test of *Wehbe v Pittwater* [2007] NSW LEC 827 and demonstrate the following:

1. Compliance with the particular requirements of Clause 4.6, with particular regard to the provisions of subclauses (3) and (4) of the LEP;
2. That there are sufficient environment planning grounds, particular to the circumstances of the proposed development (as opposed to general planning grounds that may apply to any similar development occurring on the site or within its vicinity);
3. That maintenance of the development standard is unreasonable and unnecessary on the basis of planning merit that goes beyond the consideration of consistency with the objectives of the development standard and/or the land use zone in which the site occurs;
4. All three elements of clause 4.6 have to be met and it is best to have different reasons for each but it is not essential.

### **3.3 Randwick City Council v Micaul Holdings Pty Ltd [2016] NSWLEC 7**

In *Randwick City Council v Micaul Holdings*, the Court allowed a departure from development standards, provided the processes required by clause 4.6 are followed, a consent authority has a broad discretion as to whether to allow a departure from development standards under clause 4.6, even where the variation is not justified for site or development specific reasons.

Preston CJ noted that *the Commissioner did not have to be satisfied directly that compliance with each development standard was unreasonable or unnecessary in the circumstances of the case, but only indirectly by being satisfied that the appellant's written request had adequately addressed the matter in clause 4.6(3)(a) that compliance with each development standard was unreasonable or unnecessary.*

### **3.4 Zhang v City of Ryde**

Commissioner Brown reiterated that clause 4.6 imposes three preconditions which must be satisfied before the application could be approved:

1. The consent authority must be satisfied that the proposed development will be consistent with the objectives of the zone;
2. The consent authority must be satisfied that the proposed development will be consistent with the objects of the standard which is not met; and
3. The consent authority must be satisfied that the written request demonstrates that compliance with the development standard is unreasonable or unnecessary in the circumstances and there are sufficient environmental planning grounds to justify contravening the development standard.

It is only if all of these conditions are met that consent can be granted to the application, subject to an assessment of the merits of the application.

The Commissioner applied the now familiar approach to determining consistency with zone

objectives by considering whether the development was antipathetic to the objectives.

In contrast to four2five, the reasons relied on to justify the departure from the standards in this case were not necessarily site specific.

### **3.5 Action Pty Ltd v Woollahra Municipal Council [2018]**

In Action Pty Ltd v Woollahra Municipal Council, the court demonstrated the correct approach to the consideration of clause 4.6 requests, including that the clause does not require that a development that contravenes a development standard, must have a neutral or better environmental planning outcome than one that does not.

## 4. Consideration

The following section addresses the provisions of clause 4.6 of the MLEP 2013 together with principles established in the NSW Land and Environment Court Case Law outlined above.

**Clause 4.6(3)(a) - Is compliance with the development standard unreasonable or unnecessary in the circumstances of the case (and is a development which complies with the development standard unreasonable or unnecessary in the circumstances of the case)?**

In order to demonstrate that compliance with the development standard is unreasonable or unnecessary, in the circumstances of the case, the Five (5) Part Test established in *Winten v North Sydney Council* and expanded by Justice Preston in *Wehbe v Pittwater* [2007] NSW LEC 827 is considered: The five ways outlined in *Wehbe* include:

### 3.1 Five (5) Part Test - *Wehbe v Pittwater*

#### 1. *The objectives of the standard are achieved notwithstanding non-compliance with the standard (First Way).*

The objectives of the standard are:

*(a) to provide for building heights and roof forms that are consistent with the topographic landscape, prevailing building height and desired future streetscape character in the locality,*

#### Comment

Consistent. The existing dwelling has a maximum building height of 9.1 metres and the development proposes to continue the existing maximum height to the first floor additions. The variation applies to a small section of the building and the resulting dwelling retains a scale consistent with the existing dwelling and surrounding properties.

Figure 1. Plan Extract: Section A-A

*(b) to control the bulk and scale of buildings,*

Comment

The proposed built form is, for the most part, compliant with the maximum height of 8.5m. The proposed numerical non-compliance applies to a small section of the first-floor roof only, continuing the existing maximum building height.

The proposed development will not present with excessive bulk from the public domain as the variation is minor. It is considered this objective is met, despite the numerical variation.

*(c) to minimise disruption to the following:*

*(i) views to nearby residential development from public spaces (including the harbour and foreshores),*

*(ii) views from nearby residential development to public spaces (including the harbour and foreshores),*

*(iii) views between public spaces (including the harbour and foreshores),*

Comment

A site visit has been undertaken and it is considered the proposed development will have no impact on views from the subject site or adjoining properties.

It is therefore considered this objective is met, despite the numerical variation.

*(d) to provide solar access to public and private open spaces and maintain adequate sunlight access to private open spaces and to habitable rooms of adjacent dwellings,*

Comment

The proposed variation to height does not result in any unreasonable solar access impacts to adjoining properties. Given that compliant solar access is achieved, despite the height variation sought, it is considered the underlying objective of this clause has been satisfied.

*(e) to ensure the height and bulk of any proposed building or structure in a recreation or environmental protection zone has regard to existing vegetation and topography and any other aspect that might conflict with bushland and surrounding land uses.*

Comment

N/A – the site is not located in a recreation or environmental protection zone.

**2. *The underlying objective or purpose of the standard is not relevant to the development and therefore compliance is unnecessary (Second Way).***

This exception to development standards request does not rely on this reason.

**3. *The underlying object or purpose would be defeated or thwarted if compliance was required and therefore compliance is unreasonable (Third Way).***

This exception to development standards request does not rely on this reason.

**4. *The development standard has been virtually abandoned or destroyed by the Council's own actions in granting consents departing from the standard and hence compliance with the standard is unnecessary and unreasonable (Fourth Way).***

This exception to development standards request does not rely on this reason.

**5. *The zoning of the particular land is unreasonable or inappropriate so that a development standard appropriate for that zoning is also unreasonable and unnecessary as it applies to the land and compliance with the standard would be unreasonable or unnecessary. That is, the particular parcel of land should not have been included in the particular zone (Fifth Way).***

This exception to development standards request does not rely on this reason.

This clause 4.6 variation request establishes that compliance with the development standard is unreasonable or unnecessary in the circumstances of the proposed development because the objectives of the standard are achieved and accordingly justifies the variation to the height of buildings control pursuant to the First Way outlined in Wehbe.

Thus it is considered that compliance with Clause 4.6(3)(a) is satisfied.

**4.2 Clause 4.6(3)(b) – Are there sufficient environmental planning grounds to justify contravening the development standard?**

There are sufficient grounds to permit the variation of the development standard. The development has been considered below with particular reference to the Objects of the Environmental Planning and Assessment Act 1979, which are accepted as the best gauge of *environmental planning grounds*. In particular:

**Context**

- The area surrounding the subject site is characterised by one and two detached residential dwellings (a number with lower level garages or carports on the street frontage) and three storey multi-dwelling housing.

- The existing dwelling has a maximum building height of 9.01 metres and the development proposes new works, at the existing maximum height, to extend the existing first floor which is considered reasonable and consistent with clause 1.3(c), (d) and (g).
- Variation to the Manly LEP 2013 Cl. 4.3 Building Height control has been the subject of recent precedent for the following developments:
  - DA 2019/1108 – 21 Wattle Avenue, Fairlight, Height Variation 8.8%,
  - DA2022/2053 - 16 Richmond Road SEAFORTH, Height Variation 6.25%,
  - DA2023/0429 - 13 Bareena Drive BALGOWLAH HEIGHTS NSW 2093, Height Variation 7%,
  - DA2022/1815 - 22 Curban Street BALGOWLAH HEIGHTS NSW 2093 Height Variation 9.4%,
  - DA2022/1046 - 8 Bligh Crescent SEAFORTH NSW 2092, Height Variation 11.14%,
  - DA2023- 0071 - 15 Princes Promenade SEAFORTH NSW 2092, Height Variation 11.7%
  - DA2022/1784 - 35 Fisher Street BALGOWLAH HEIGHTS NSW 2093, Height Variation 14.1%
- The setting and context with similar height variations recently approved, demonstrates that a varied building height is reasonable and that it is consistent with clause 1.3(c) and (d).

### **Future Development**

- The proposed alterations and additions will allow for the refurbishment of the existing dwelling, providing a modern floor plan for the enjoyment of the residents,
- The vast majority of the resulting development complies with the 8.5 metre height control, with a variation of 0.6 metres or 7% proposed,
- This represents an efficient use of an existing developed site, with all services readily available.
- The built form proposed is consistent with the existing building height on the site and consistent with other buildings in the locality,
- The proposed works will not hinder any future development of the lot.
- The refurbishment and additions proposed demonstrates fulfillment of clause 1.3(a), (b), (c) and (g).

### **Consistent with Zone Objectives**

- The extent of the variation is considered to be in the public interest, as the proposal remains consistent with the objectives of the zone, allowing for the modernisation of

an existing residential dwelling, of a bulk and scale consistent with the locality. Compliance with the building height standard based on this would be unreasonable, with clause 1.3(c) demonstrated as fulfilled.

### **Natural Environment**

- The proposed development allows for the current and future housing needs of the residents to be met, without developing a greenfield site, representing an efficient use of existing developed land.
- The development does not require the removal of any significant native vegetation,
- The proposed additions to the existing first floor allows for environmental impacts to be minimised, by locating works within the existing building footprint.
- The natural environment is unaffected by the departure to the development standard and it would be unreasonable for the development to be refused on this basis with CI 1.3(b) satisfied.

### **Social and Economic Welfare**

- The variation to the building height will have a positive social impact, as it will allow the housing needs of the residents to be met in their current local community, satisfying CI1.3(b) and accordingly refusal of the development based on this reason would be unreasonable.

### **Appropriate Environmental Planning Outcome**

- The alterations and additions proposed do not represent an overdevelopment of the site and satisfies the objectives of the zone and the development standard as is detailed earlier in the report.
- The variation does not result in a dwelling with excessive bulk, with the maintenance of the existing maximum building height.

The variation to the building height and the discussion above reflects the unique circumstances for the subject site and proposed development. The development will not present with excessive bulk from the public domain and largely presents with a complaint height.

By supporting this variation, in its current form, it is considered that an appropriate degree of flexibility be applied, which results in a reasonable built form, consistent with the existing dwelling and other properties in the locality.

The sufficient environmental planning grounds stipulated above demonstrate that the proposal aligns with the relevant objects of the EP&A Act i.e. the development is an orderly and economic and development of the land, notwithstanding the building height variation.

**Clause 4.15(1)(e) of the *Environmental Planning and Assessment Act 1979***

***Will the proposed development be in the public interest?***

It is considered that alterations and additions to an existing residential dwelling, does not raise any matters contrary to the public interest.

**How would strict compliance hinder the attainment of the objects specified in Section 1.3 of the Act.**

Strict compliance with the standard would hinder the attainment of the objects specified in section 1.3 of the Act

- (a) to promote the social and economic welfare of the community and a better environment by the proper management, development and conservation of the State's natural and other resources,*
- (b) to facilitate ecologically sustainable development by integrating relevant economic, environmental and social considerations in decision-making about environmental planning and assessment,*
- (c) to promote the orderly and economic use and development of land,*
- (d) to promote the delivery and maintenance of affordable housing,*
- (e) to protect the environment, including the conservation of threatened and other species of native animals and plants, ecological communities and their habitats,*
- (f) to promote the sustainable management of built and cultural heritage (including Aboriginal cultural heritage),*
- (g) to promote good design and amenity of the built environment,*
- (h) to promote the proper construction and maintenance of buildings, including the protection of the health and safety of their occupants,*
- (i) to promote the sharing of the responsibility for environmental planning and assessment between the different levels of government in the State,*
- (j) to provide increased opportunity for community participation in environmental planning and assessment.*

Strict numerical compliance with the 8.5 metres height development standard would hinder the development for the purpose of *promoting the orderly and economic use and development of land, promoting good design and amenity of the built environment and promoting the proper*

*construction and maintenance of buildings, including the protection of the health and safety of their occupants.*

## 5. Conclusion

The proposed development for alterations and additions to an existing dwelling on land zoned R1 – General Residential is appropriate and reasonable for the following reasons:

- The first-floor additions propose to retain and extend the existing maximum building height on the site and the proposed works remain consistent with the built form in the locality,
- The alterations and additions will allow for the modernisation of the existing dwelling, to meet the housing needs of the residents in their current community,
- The development represents an efficient use of an existing developed site, with all services readily available.
- The extension of the existing first-floor, allows for environmental impacts to be minimised, by locating works within the existing building footprint.

Strict numerical compliance is considered to be unnecessary and unreasonable given that the proposed variation sought is consistent with the underlying objectives of the control despite the numerical variation, of which have been reasonably satisfied under the provisions of Clause 4.6.

The statement sufficiently demonstrates that compliance with the development standard is both unreasonable and unnecessary in this instance.

The sufficient environmental planning grounds stipulated within this request, demonstrate that the proposal aligns with the relevant objects of the EP&A Act i.e. the development is an orderly and economic and development of the land, notwithstanding the height variation.

The proposed variation satisfies the objectives of the zone, underlying intent of Clause 4.6 and Clause 4.3, and therefore the merits of the proposed variation are considered to be worthy of approval.
