RE: DA2020/1063 - 2 / 0 Bennett Street CURL CURL NSW 2096

How can getting numbers to up the "support" for this proposal from local clubs and schools with large memberships be a fair way to gain so called "support"? Most of the people in "support" don't even live in this area... and will not have a long term commitment to any of the clubs by way of their kids involvement. How can we take their one liner "in support of the proposal" seriously - when it is obvious they have just been told to do that by their clubs and/or schools.

I am a youth that plays sport and I see no need for extra playing fields to have lighting, the ones that already have lighting are not utilised as well as they could be. Why don't we use what we have rather than causing upheaval to the community and wasting thousands and thousands of taxpayers money? I am baffled as are my family and friends in the community.

The local residents will have to live with the long term consequences of any decision made by council. The consideration of the residents directly affected should be the councils primary concern. What with noise pollution, light pollution and the damage the lighting could do to endangered wildlife. I am hugely disappointed and upset that the council is even considering this.

As a youth who plays sport locally and a resident of Manuela Place, I want to reiterate I'm not against recreation or community sports. However, I am completely against bright floodlights, increased noise and the resulting traffic and parking problems that local residents will have to endure in our street and the surrounding streets every single night!
