**RE: REV2019/0039 - 12 Edward Street NARRAWEENA NSW 2099**

Dear Sir

Having viewed the revised plans submitted to Council re the proposed changes to the profile of the carport roof.

The construction of a metal roof is not in keeping with the appearance of the existing house roof structure. A tiled roof would be in keeping with the existing roof style for this carport.

Mr Rullo lodged a written consideration for these changes on 4th July 2019, in his consideration he made mention to the minimal loss of view from my property due to the construction type of this carport. I do not agree with that statement. Once construction commences and the southern wall is erected it will totally remove my view of Long Reef Golf Course and the beach, gone will be the view of hang gliders over the headland.

Benjamin Price you are the planner in charge of this application, i invite you to visit site and see first hand the view that will be lost.

Regards  
Garry Swift
