RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

I am not understanding how cars southbound on Forestway can enter if Russell is exit only. Why is there no traffic management plan showing vehicles per hour moving in/out of a complex that can hold 700 cars? As someone who has used Grace Ave many times I can say that it is already a very busy back street that has parked cars and traffic control devices making it a dodgem track. There is also no bicycle path access from Forestville forcing cyclists to use this rat run.

Simulated facades look nice though.
