Sent:15/11/2019 2:02:34 PMSubject:Submission by Spencer DA 2019/1173 5 Berith Street Wheeler HeightsAttachments:CameraRoll.jpg; Driveway & tree 1.jpg; Driveway & tree 2.jpg;

Dear Sir/Madam,

I would be grateful if these photos could accompany my online submission. I draw attention to Jacksons Nature Works, Aborist report Plate 14, tree 20 with informal footpath. When compared with my cross over & driveway photos, I believe this plate has been photoshopped.

Yours sincerely, Amanda Spencer

21 & 22 Angophora costant. They are examination of the street the corner residence in Berith Street. Our examination of the street from Traneighbour's tree has concluded the majority of the roots from Traneighbour's tree has concluded the majority of the roots of tree 23 are not on the street side of the root plate and the roots of tree 23 are not 14 & 15. The same construction methodology can be used within tree 1, i.e. use asphalt within their TPZ radii then reverting to considerations – plus some meandering can be used near tree 20. It a informal track (footpath) along this street – refer plate 14. By emproved considerations, the retention of these trees will be achieved. N.B required. Note these trees for retention and trunk protection in the location to be confirmed by Council's Engineering department.

Plate 14: tree 20 with informal footpath on the east
