RE: DA2023/0718 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Though I have lived on the Central Coast for the past 6 year I have maintained my membership at Bayview Golf Club and play the course once a week.

When I joined some 24 year ago it was expected that all greens would be replaced over time and today only 8 have been completed... so there are some extremely old greens on the course.

With improved techniques available today in the construction of greens the council must see it as an advantage to the environment around the course with less chemicals being required to maintain new bent greens. Also less watering would be required hence less impact on local waterways.

I therefore wish to add my support to the DA proposed for Bayview Golf Club.
