**RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100**

This proposal should NOT be approved. It will make traffic in the area too heavy on streets that already can't cope with the current congestion. Oxford Falls is home to flora and fauna that need protecting and increased traffic and construction will damage the already delicate ecosystem.

There is no surrounding infrastructure which could support further additions to this site and it will endanger the community in terms of the area being a fire hazard and with one road in and out, so any evacuation could be a disaster.
