**RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099**

I absolutely do not support this Optus tower being installed. It is in parkland and public space that is shared by an overwhelming number of locals and visitors to the area for the purpose of sporting commitments and maintaining a healthy lifestyle. Telecommunications towers especially those that may assist with 5G signal strength is not proven to be 100% safe for children, local wildlife and those who live nearby. To support and approve this shows little respect for human life, human development and the safety of anyone who must spend short or long periods of time within close proximity to such a structure.

Please install it away from houses and public spaces if it must be installed at all. We are all dealing with health ramifications, especially with covid 19. The community and its visitors do not need such a health risk in the area.

Thanks for your consideration and please help us all to help each other. We all know from first hand experience lately how precious lives are. We don't need more radiation and other waves in the air around living creatures and humans.
