RE: DA2020/1167 - 9 Francis Street DEE WHY NSW 2099

I am an Ear Nose and Throat Specialist. My consulting rooms are next door to the proposed development. In fact, my rooms are only 3 metres from the boundary located at the rear of 22 Fisher Rd. My practice depends on a calm and quiet ambiance. I have been here for almost 20 years. I do hearing tests frequently, so I am very concerned about potential demolition noise and then potential rock drilling noise and jack hammer noise during building. I am also concerned about dust from the site affecting my rooms and my patients. Please consider my comments prior to permitting this development. If permitted I would hope to be able to consult with the developer to limit noise generation to certain times when I was not consulting in my surgery.
