RE: DA2021/1508 - 882 A Pittwater Road DEE WHY NSW 2099

We live on the back of the proposed development in 882A pitwatter road and on the other side of the other side of our apartment we have the new development havana which is going to go 10 floors up, right now the lower height of pitwster 882 allows some light and air to come into our apartment and outdoor area, once havana is built 882 pitwater will be the only way air and light is going to get into us (we live in the 1st floor of 10 oaks) if this new development happens our loved home will become a dark & cold dump in the middle of just high rise buildings with no natural light or breeze all our outdoor plants (palm trees) will die

in another hand then works in havana are going to be very painful for us, we don't need a sandwich on both sides of the home with construction sites to happen at the same time.

Regards

yago
