Mr. B. Worthington
95 Wimbledon Avenue,
NARRABEEN NSW 2101

Dear Brook,

RE: 95 WIMBLEDON AVENUE, NARRABEEN

As instructed I have carried out a survey to determine the reduced level, based on Australian Height Datum, of the ridge levels of the new metal roof of the residence on the subject land. I have compared the results of this survey with the results of our survey reference 10939D2 Issue B dated 17-09-21. The roof at the date of the survey referenced 109939D2 Issue B was a tiled roof.

In my opinion the reduced level of:

- a. The lower ridge of the new metal roof of the residence is 6.58 AHD (Tiled roof about 6.6AHD)
- b. The highest ridge of the new metal roof of the residence is 7.92 AHD (Tiled roof about 9.0 HAD).
