STATEMENT OF ENVIRONMENTAL EFFECTS

For Mr J & Mrs G Liepa

At 15 Delmar Parade, Dee Why
Covering First Floor Additions

and/or Alterations to an Existing Residence

CAPE COD AUSTRALIA PTY LTD

Designers and Builders of quality home additions since 1965

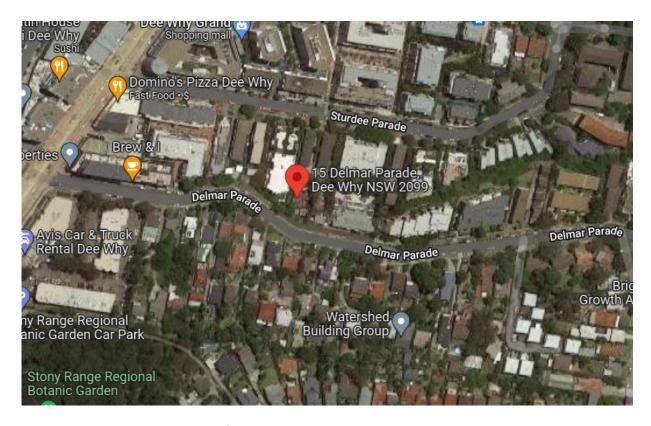

Level 4/410 Church Street, North Parramatta NSW 2151 - PO Box 2002, North Parramatta NSW 1750

Phone: 9849 4444 - www.capecod.com.au Builders License No. 5519 - ABN 54 000 605 407

1. Site Details

Address:	15 Delmar Parade Dee Why NSW 2099
Lot and Deposited Plan Number:	Lot: B in DP: 408582
Local Government Area:	Northern Beaches
Parish and County:	Parish of Manly Cove in County of Cumberland
Zone:	R3: Medium Density Residential
Site Area:	551.70m ² (By Survey) and 556.40m ² (By Title)
Existing Residence:	Two to Three Storey brick residence with tiled roof

Aerial Photo of the Subject Property & Adjoining properties

2. Scope of Works

The proposal consists of:

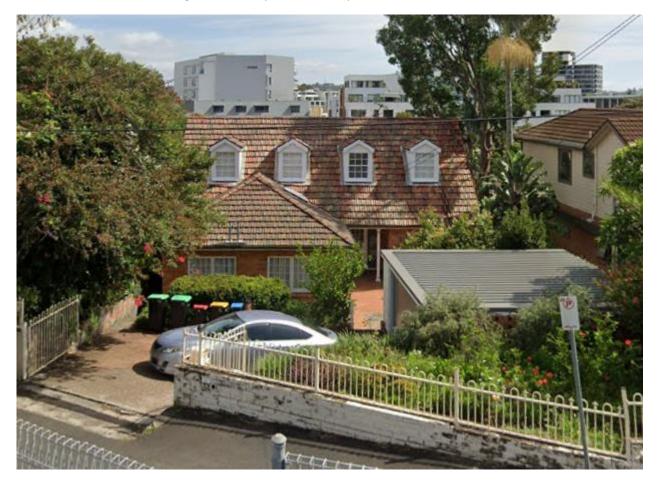

- Construction of Upper floor addition
- Alterations/Renovations to Existing Residence

The proposed new first floor addition will contain an additional sleeping quarter for the residence built wholly within the existing building footprint. It comprises of two (2) bedrooms and a bathroom.

This first-floor addition for the greater part is to be of lightweight timber framed construction with weatherboard cladding over a polystyrene wall. The roof of the addition will be a complimentary articulated gambrel roof structure with Dutch gables on the site elevations, covered with terra cotta roof tiles reusing existing roof tiles where possible to further blend and harmonize the works.

The proposal includes internal alterations and renovations to the front section of the existing first floor. This is achieved by firstly removing the external wall enclosing the current study and lobby to allow for an access to the proposed works. While on the ground floor the proposal also includes removal of a wall between dining room and a bedroom (relocated to first floor) to allow a decent sized space for a family dining.

Whilst externally the proposal includes demolition of existing ground floor roof and two Dutch gables on the first floor located towards the left side of the front elevation to allow for the proposed addition, all as shown in the submitted drawings which completes the scope of works.

3. Site Suitability

The Northern Beaches displays a wide variety of urban characters reflecting the following.

- Differences in topography, street pattern and landscape
- Different types and quantities of vegetation
- Successive stages of development
- Changes in architectural style and building materials over time and
- Differences in building size and form achieved under a range of planning controls

The proposal reflects the above character, is site responsive, and is consistent with needs for additional upgraded accommodation as acknowledged by other re-developments upon the surrounding properties. A sensitive response to the elements such as the character of the host structure, the prevailing mixed and varied character of the neighbourhood, the streetscape, site constraints, etc. all have been considered in the design process.

Views	WDCP 2011 - Part D - D7	Objectives To allow for the reasonable sharing of views. To encourage innovative design solutions to improve the urban environment. To ensure existing canopy trees have priority over views	Yes	The proposed addition covers only a section of existing footprint and will not obstruct any views from the street and from the dwelling .
Safety and Security	WDCP 2011 - Part D - D20	Objectives • To ensure that development maintains and enhances the security and safety of the community.	Yes	The proposal will not hinder the existing ability to allow for casual surveillance of the dwelling from the street and of the street from the dwelling
Privacy	WDCP 2011 - Part D - D8	Requirements 1. Building layout should be designed to optimise privacy for occupants of the development and occupants of adjoining properties. 2. Orientate living areas, habitable rooms and windows to private open space areas or to the street to limit overlooking. 3. The effective location of doors, windows and balconies to avoid overlooking is preferred to the use of screening devices, high sills or obscured glass. 4. The windows of one dwelling are to be located so they do not provide direct or close views (ie from less than 9 metres away) into the windows of other dwellings.	Yes	Visual and acoustic privacy was a prime consideration in the design brief for both that of adjoining properties and the client's own amenity.

27-May-2022 (ATM/DRA)

	Notes: The proposal containing only one additional low usage bedroom will not cause an unreasonable privacy amenity loss to habitable rooms or principal private open spaces of other dwellings. Whilst the primary outlooks from the proposed fenestrations are orientated mainly towards the front of the side, side-facing windows are an unavoidable necessary component to an upper floor addition of the likes. However, the impacts of these side-facing windows will be minimal, being located within a bedroom, a wet area should not cause concerns for privacy. Notwithstanding the presence of neighbouring two to three storey dwellings, further diminishes the perceived impacts of privacy loss thereby maintaining the status quo.

5. Site Setback Justification

The existing dwelling stands built prior to the introduction of the Local Government Act of at a minimum distance by detailed survey of 1470mm from the western side boundary. The proposal seeks to site the first-floor addition generally directly above the external sidewalls below, primarily for the overall aesthetics and harmony of the massing. Therefore, the new upper floor addition will observe these established setbacks.

This will result in non-compliances for the proposed first floor being 1245mm on the western side from the boundary, in these specific instances are fully justifiable. We respectfully submit that both the stated general and the stated specific objective requirements will be fulfilled as outlined by the following:

- The subject property maintains its presence as a single occupancy dwelling built upon a lot zoned R3 Medium Density Residential, and
- The building as altered would be entirely compatible with the prevailing desired character of the built form of the immediate locality, and
- The overall building height as indicated on the submitted drawings fully complies, and.
- These encroachments are a direct result of the inherent nature of building upon an existing structure, thus resulting in various planning and design restrictions, and
- The encroachment is not unlike that which councils have approved for similar developments throughout the area and noting that which immediately adjoins, and
- A strictly compliant development would severely restrict the ability to provide the social benefit sought from the increased living space and amenity provided by the proposal and would not result in the most co-ordinated or orderly development of the land possible, and
- The proposal satisfies all of the Objectives and Performance Requirements, and the BCA notwithstanding the numeric non-compliance.

We believe that a variation to this development standard will not result in a precedent for other undesirable development, due to the modest nature of the encroachments and sympathetic compatible design solution of this development.

6. Conclusion

This development application seeks to undertake alterations including an upper floor addition to an existing two to three storey dwelling house all as described on the submitted plans. The proposal maintains the key elements of the streetscape and will not unduly compromise the level of amenity presently enjoyed by adjacent sites.

The proposal has no social or economic impact on the locality. It enhances and blends with the streetscape as a whole whilst meeting the functional and lifestyle needs of the client. The proposal is consistent with Councils aims, objectives and limited controls for residential development in the R3 Medium Density Residential zone. It is permissible under WLEP 2011 and represents a suitable, modest development of the site.

Within the immediate area of the proposal, it was found that the surrounding homes are of a similar or greater bulk and scale to that of the subject property. These matters have been analysed within this report, which demonstrate that the complete dwelling would have only neutral or positive outcomes.

The proposal was found to be compliant in all areas, except for a justified side setback non-compliance and height, together with a pre-existing breach in the landscape control, the proposal is considered satisfactory, causing no adverse planning, environmental, social or economic consequences.

In light of the merits of the proposal and the absence of any adverse social or Environmental impacts, the application is worthy of Councils support and therefore approval.

Kind Regards,

Cape Cod Australia Pty Ltd.
