Officer comments

The property adjoins Pittwater Waterway downslope. The proposed works are consistent with the character of properties in the localised area, and the significant environmental features in the rear setback facing the waterway will be retained. All development works must ensure that surface sediment runoff and/or erosion is controlled, managed and contained within the site boundaries.

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.
