RE: DA2019/1426 - 77 Collingwood Street MANLY NSW 2095

I can't see why this would be a problem. I am an active patrolling member of the surf club opposite and get coffee from this cafe all the time. The side window works very well and allows customers to wait on the side of the building and not line up out the door to where the heavily used pedestrian crossing is located. This would be much more dangerous to the other customers and traffic across the crossing and also have an impact on the business as people would be less likely to go there if they had to line up out the door.
