Re DA 2024/1216 – North Harbour Marina Proposal

Dear Council team,

I write this email of support regarding DA2024/1216.

I support the proposed upgrades to North Harbour Marina outlined in DA2024/1216 and believe it addresses, in a comprehensive and responsible way, all the required upgrade issues, from access to waterways for all recreational boating communities to positive environmental sustainability results.

I envisage that the upgrade outcomes will enhance the Community especially with the proposed removal of 10 swing moorings plus the addition of modern dinghy, paddleboard, canoe and kayak organized storage solutions. The removal of the 10 moorings will give an increase in width of the waterway channel which will greatly improve navigation and waterway safety.

The health benefits of activities such as kayaking, canoeing and paddleboarding, are numerous and they are fast becoming very popular activities. Improvements to waterway access for these activities will be greatly appreciated by participants of these activities and I believe this upgrade proposal represents a responsible plan with sustainable methods.

Yours truly,

Diane Kuhl
