RE: DA2024/1249 - 0 East Esplanade MANLY NSW 2095

I am contacting you regarding the above DA on behalf of my husband and myself. The only real comment that we wish to make concerns the "live performance spaces". We hear little from the pub on the Wharf even though we live in Addison Rd on the Eastern Hill directly above the Wharf. But very occasionally hear the penetrating continuous and loud bass sounds of what we can only call "doof doof music" which thumps continuously making life very difficult. Were that to become a regular occurrence we would certainly object along with much of Manly I would suspect. Would it be possible to give approval with a condition of playing only music that does not have a loud and thudding bass which carries over great distances and makes life miserable for those living here?
