RE: DA2021/2039 - 70 A Willandra Road NARRAWEENA NSW 2099

This is a submission opposing the proposed development on behalf of Northern Beaches Envirolink.

Our group understands the need to have environmental assets retained for overall human wellbeing, human recreation and for biodiversity protection.

Developments in a location as this require to be sensitive regarding the environment, its landforms, its biodiversity of flora and fauna and the short and long term degrading potential which result from development.

The LEP2000 is our instrument to hold up some of these aspects at least and it must be strictly applied. The development is out of character for its size and imposing scale and it is not sympathetic to the bushland surrounds and must be objected..
