Subject: DA2024/1216

Dear Council,

I am writing to express my support for the upgrades proposed in DA2024/1216 for North Harbour Marina. The improvements will make a real difference to both safety and usability, ensuring the area remains accessible for all types of watercraft.

The planned removal of swing moorings is a practical step toward reducing congestion and improving navigation. A designated 50m-wide channel will also enhance safety for smaller vessels by providing a clear, structured route through the harbour. At the same time, the addition of proper kayak and dinghy storage is a welcome upgrade that meets the needs of local water users.

This proposal is a smart and balanced approach to improving North Harbour. I encourage the council to approve it.

Adam Bloomfield
