

## Natural Environment Referral Response - Coastal

<b>Application Number:</b>	DA2022/0808
<b>Date:</b>	23/06/2022
<b>Responsible Officer</b>	Clare Costanzo
<b>Land to be developed (Address):</b>	lot 11 DP 1026519 Maritime Lic 30002506 , 39 Seaforth Crescent SEAFORTH NSW 2092 lot 11 DP 1026519 Maritime Lic 30002506 , 39 Seaforth Crescent SEAFORTH NSW 2092

### Reasons for referral

This application seeks consent for land located within the Coastal Zone.

And as such, Council's Natural Environment Unit officers are required to consider the likely impacts on drainage regimes.

### Officer comments

This application was assessed in consideration of:

- Supplied plans and reports;
- Coastal Management Act 2016;
- Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005;
- Sydney Harbour Foreshores and Waterways Area Development Control Plan 2005;
- State Environmental Planning Policy (Resilience and Hazards) 2021 (section 2.12); and
- Relevant LEP and DCP clauses.

The application meets the requirements of the relevant Environmental Planning Instruments and policies.

The application is supported subject to conditions:

- Installation and maintenance of erosion and sediment controls (prior to commencement)

The proposal is therefore supported.

Note: Should you have any concerns with the referral comments above, please discuss these with the Responsible Officer.

### Recommended Natural Environment Conditions:

#### CONDITIONS THAT MUST BE ADDRESSED PRIOR TO ANY COMMENCEMENT

##### Installation and Maintenance of Sediment and Erosion Control

Sediment and erosion controls must be installed in accordance with Landcom's 'Managing Urban Stormwater: Soils and Construction' (2004). Techniques used for erosion and sediment control on site are to be adequately maintained and monitored at all times, particularly after periods of rain, and shall remain in proper operation until all development activities have been completed and the site is sufficiently stabilised with vegetation.

Reason: To protect the surrounding environment from the effects of sedimentation and erosion from the site
