Hi Achilles,

In response to your request for comment on updated plans consisting of the lap pool moving one meter closer to the rear boundary and the installation of a roofed Cabana with a wall behind. These structures have the potential to increase the impact to trees 2, 3, 4 and 5 which are currently conditioned for retention and protection.

Given the volume of existing rock on the site and within the notional Tree Protection Zones, the modifications may be installed with negligible additional impacts to the trees on the provision all footings are to be entirely located on existing rock. No soil is to be covered or removed from the TPZ area of trees 2, 3, 4 or 5.

Please note that if any of these points are not able to be met it may result in a negative impact on the health, structure and longevity of the tree(s). All tree protection is to remain unchanged.

Hugh Millington

Senior Consultant and Director
