To whom it may concern

Dear sir, I wish to add my support to the DA presented here. I have been a supporter of this market since its inception and cannot fathom why the councillors are so strongly rejecting the opportunity for local families to have a market o their doorstep. I can sympathize with the folk who are objecting on various points such as sound, parking and traffic around their area but I believe their argument are lacking substance. The noise issue has been addressed by the experts, parking is a minimal issue and I have seen little impact of traffic on the local traffic movement. I can't see how council would be so short sighted as to not allow the market folk to have an extra period of time in which to trade.

I therefore hope you have the foresight to grant additional time for the market to operate.

Yours sincerely,

Grant and Jessica Jackson
