

WASTE MANAGEMENT PLAN

Address: 25 Hudson Parade, Clareville

Application Description: Alterations and additions to existing toilet block.

1. Demolition Stage

External walls, internal partitions and roofing will be demolished under this toilet block upgrade. The disposal of these items, and any subsequent waste will be managed by and become the responsibility of the builder contracted to do the works.

2. Construction Stage

The only construction proposed is for construction of the same elements demolished, except with a taller ceiling and higher quality materials ensuring durability. Any waste generated by these works will be managed by and become the responsibility of the builder contracted to do the works.

All efforts to minimise the extent of subsequent waste will be made.

3. On-going Stage

On-going waste disposal will be the responsibility of trained staff on-site into existing bins. No hazardous waste or overall increase in on-going waste is expected. Waste collection will be conducted as per usual.
