FLORA AND FAUNA ASSESSMENT REPORT

Property: 1114 (Flight Deck) Pittwater Road, Collaroy, NSW 2097

The subject property, and adjacent 1112 Pittwater Road and southern portion of Shipmates (1122 Pittwater Road) where rock revetment works are proposed, was inspected on 7 May 2017.

There is no evidence, within the confines of the proposed works of any threatened or endangered NSW coastal species listed in the *EPBC Act 1999*, or Threatened Species and Ecological communities listed in the *Threatened Species Conservation Act 1995*, including those which would be capable of surviving in sand and the poor quality soil at the subject properties.
